

Sprint 3 Report - Readra

Revised 5/14/2025

Stop Doing

After much deliberation we decided to stop calling the core feature “Readra - Wrapped” and instead call it “Readra - Rewind” as it was too similar to Spotify and we wanted to be unique with our own identity. This allowed us to create ideas that weren't just copies of what was already being done by spotify, and instead aim to do something more.

Start Doing

It was during this sprint that we wanted to start working on the different rewind screens and formulate a plan on how the rewind would look in the end. To that end we decided the rewind would comprise 4 main screens with unique animations and screen transitions. We would also start using the given ISBNDB data calls to create functions to manipulate our user's book data in unique and useful ways

Keep Doing

At this stage in development we wanted to keep refining the ways we manage and create features using the data we have access to. With that in mind we needed to decide if we would use full generative AI to create unique reading personalities for the rewind, or if we would use AI to map a person's reading to pre existing personalities we create.

Work Update

By the time we wrapped up sprint 3 we were able to complete all aspects of our library screen and search bar integration with our new API. All that was left was to use the data we had in the rewind screens which we started working on.

Work Completed/Not Completed

COMPLETED:

- As a user, I want to log a book I've read so I can track my reading.
- As a user, I want to search and filter my library by title, genre, or rating

NOT COMPLETED:

- As a user, I want a Rewind sent via notification.

Work Completion Rate

- Total number of user stories completed: **2**
- Total number of estimated ideal work hours completed: **71H**
- Number of days in sprint: **14**

User stories that were completed during the previous sprint:

- As a user, I want to log a book I've read so I can track my reading.
- As a user, I want a home screen/dashboard so that I can see the most important info at a glance.
- As a user, I want to search and filter my library by title, genre, or rating.

User stories not completed during this sprint (but were part of this sprint plan)

- As a user, I want a Rewind sent via notification.

Completed user stories in this sprint:

- As a user, I want to log a book I've read so I can track my reading
- As a user, I want to search and filter my library by title, genre, or rating
