

Readra – Code Style Guidelines

Project Folder Structure

/api

- Contains helper functions which retrieve data from the following APIs: Supabase, ISBNdb, OpenAI

/assets

- Images, fonts, etc.

/components

- Reusable UI components

/context

- Global state or providers

/data

- JSON file data which all possible user-generated reading personalities

/navigation

- Organizes flow between screens and specifies stack hierarchy

/screens

- Includes necessary scenes which we display to the user (Rewind, Home, Profile, Login, etc.)

/styles

- Holds each screen's unique stylesheet

Git Conventions

Every feature will be within its own branch formatted: <dev initials>/<feature>

Name Conventions

We didn't have strict naming conventions other than to make all variable and function names read as they do (eg. put_book adds a book to the database)

Code Formatting

Everyone was provided a linter configuration and we linted before every commit.
